## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Schwebel et al (US 3,802,430).

Schwebel teaches a disposable needless injector comprising a body (11), an initiation device (27), a reservoir (14), and a pyrotechnic gas generator with a first volume (26), a second volume (25), and a pressure regulator (passageway), further comprising an expanding membrane (42). As to claim 2, Fig 1; claim 3, subvolumes 28 and 26; claims 4-8, second device rupturable membrane which pierced by 27); claims 9 and 10, Figures 1 and 2.

### *Allowable Subject Matter*

3. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach or suggest an L-shaped cartridge, in combination with the other limitations of the claims.
